

FOR IMMEDIATE RELEASE...

**Soil Moist
Water Management Polymers
For Hydroseeding and Erosion Control**

Soil Moist HYDRO polymer products, is designed for hydroseeding applications to increase seed germination and reduce erosion on slopes and hills. The product is designed to retain high amounts of moisture. Soil Moist Hydro will increase the moisture retention of the mulch matrix which is more conducive for seed germination. With the quicker seed germination, erosion on slopes and hills is reduced.

The polymer is simply mixed in the hydroseeding tank along with mulch and seed; stores over 200 times its weight in water and is very cost effective.
