

For Immediate Release...

Snow Real, Instant Decorative Snow

JRM Chemical's Snow Real, instant decorative snow, can be used for home décor, holiday displays, table centerpieces and candle arrangements. Available in attractive retail packages for your customers, or in bulk for in-house, etc.

Each ounce of the dry product, when mixed with water, makes over two quarts of white fluffy, glistening snow, just like real snow. Snow Real can be used to replace shredded foam.

The product is non-toxic and environmentally safe. Ideal with candles since the product will not burn and actually extinguish any open flame that comes in direct contact with the product.
