Soil Moist™ Granules

Soil Moist granules are the eco-safe, water-storing polymers that your customer simply place in their planting soil, then water. Soil Moist is designed to reduce plant waterings by 50% and last 3-5 years in the soil. Plant lovers and gardeners love the convenience and reassurance. You'll profit from this unique concept and irresistible impact at point of sale!

Soil Moist Plant Paks

Soil Moist Plant Paks PLUS

Soil Moist™ Plant Paks

Here's the easiest way for your customers to add Soil Moist to their plants. These biodegradable "drop-in" paks contain pre-measured Soil Moist granules. Once placed in the soil and watered, they release stored water back to the plant as the soil begins to dry. Soil Moist Paks are designed to reduce plant waterings by 50%. Soil Moist Plus Paks both water and feed with an 8 – 9 month time-released 9-3-6 fertilizer.

Soil Moist™ E-Z Root™ Compound

E-Z Root™ is an **organic** microbial based rooting compound to help grow new plants from cuttings. The natural occurring bacteria improves soil conditions for root growth. E-Z Root™ works on rooted and unrooted cuttings. It can be used as a dip, a drench in soils or as an additive in hydroponic systems.

The three strain microbial species with an **organic** based fertilizer is ideal for all plants, flowers, vegetables and trees. E-Z Root™ is packaged in attractive two-ounce and eight-ounce resealable bags. Detailed instructions on the back of the package helps the customers for successful plantings. Included in each package is a measuring scoop.

Soil Moist™ Plant Thrive

Soil Moist™ Plant Thrive

Plant Thrive is an **organic** microbial based formulation that improves soil conditions for plant growth and improves plant establishment. Plant Thrive is for all plants, flowers, vegetables and trees. It can be applied as a soil amendment when planting or as a drench and a foliar spray. There are 18 strains of highly active beneficial bacteria with four strains of fungi. Each ingredient in the formula was chosen based on the benefit it affords the plant as well as the synergies it affords the system as a whole.

Soil Moist™ NitroGreen & WaterAide

Nitrogreen **organic** fertilizer and Water Aide wetting agent create healthier, more vibrant plants... professional results that will have customers coming back for more!

Nitrogreen 13-0-0 is a 100% plant-based **organic** fertilizer for use on all plants and vegetables. OMRI approved, it is derived from hydrolyzed non-GMO plant protein. The all-purpose fertilizer is 100% water soluble and goes into solution quickly to ensure immediate delivery of its nutrients. Nitrogreen has the highest nitrogen available in the **organic** industry which is essential for plant growth and establishment. A plant-based fertilizer, Nitrogreen will not burn plants.

Water Aide is an **organic** hybrid wetting agent that improves water efficiency on soils for all types of plants, vegetables and lawns. Water Aide is a combination wetting agent, soil penetrant and drift retardant. It increases water penetration in the soil with less runoff and disperses the water throughout the soil media. This enhances fertilizer and nutrient uptake with less waste. A gel compound, Water Aide traps water in the soil and helps reduce plant waterings.

Soil Moist NATURAL

Soil Moist™ Natural

Meet today's major demand for "natural" products with eye-catching Soil Moist Natural granules. Completely safe and biodegradable like Soil Moist polymer-granule products, it contains **organic** starch derived from corn. When mixed into the soil and watered, it absorbs several hundred times its weight in water and releases it to plants as the soil dries. Reduces the need for plant waterings by up to 50% for an entire season!

Soil Moist™ SEED COAT

JCD-08SC
8-oz. Jar
Treats 50 lbs. of seed.

JCD-02SC
2-oz. Box
Treats 12 lbs. of seed.

Soil Moist™ Seed Coat

Soil Moist Seed Coat is a crosslinked polymer and graphite compound. It is designed to increase the germination of grass, wildflower, and other types of seeds. The polymer compound retains excess moisture on the seed surface from water and humid air. The moisture on the seed softens its tissue to increase germination and establishment. The graphite compound retains heat on the surface of the seed to promote a faster germination in less time. The graphite helps lubricate the seed and equipment to help spread the seed. The two-ounce package will treat up to 12 pounds of grass seed and the eight-ounce jar will treat 50 pounds of seed.

Compared to non-treated grass seed, independent research and testing have shown that Soil Moist Seed Coat increases the speed of germination by over 20%, increases the percentage of germination by over 21% while increasing turf establishment by over 24%.

ITEM	PRODUCT CODE	CASE PACK

For complete ordering and merchandising assistance, talk with your JRM Distributor or call us at **800-962-4010**.

We're JRM, innovators of the best way to grow on earth...and the most unique decorating, craft and holiday products...all fun and easy...and importantly to today's consumers—nontoxic, nonflammable and eco-friendly.

We started with a cross-linked polymer and developed it into several formulations, polymer encapsulated timed release fertilizers, mycorrhiza and other beneficial ingredients. These products increase plant growth and establishment with less waterings. From there, we developed fun, safe and colorful ways for consumers to create and decorate.

For retailers, we present our products in bright, high-gloss, moisture resistant packages that capture shoppers' eyes and imaginations. We keep our merchandising easy, compact, powerful, and as efficient as possible. For the professional market we offer a full line of commercial sizes and products.

Watch for more innovations from us. Doing good things for the earth, today's families, and our valued distributors and retailers is what we're all about.
